**REORIENTATION: SELF STUDY GUIDE
MANDATED SECTION TEST**

2013

PRINT Name (Last name, First):	Employee No:	Job Class:	Work Area/Shift:	Date:
---------------------------------------	---------------------	-------------------	-------------------------	--------------

I hereby attest that I understand that I am not to discuss, share or copy the confidential Harbor-UCLA Medical Center Reorientation Self Study Guide, Clinical Competencies testing answers.

I acknowledge the following:

1. I have read the Reorientation Self Study Guide, Mandated Section materials.
2. I have reviewed and completed the questions in the Self Study Guide
3. I was given the opportunity to ask questions and obtain additional information about the Reorientation Self Study Guide, Mandated Section materials.
4. The answers provided on this answer sheet are my own.

Employee: _____ **Date:** _____
(Signature)

Subject areas from the Reorientation Self Study Guide, Mandated Section: Patient Care Management (body mechanics, ergonomics, HIPAA, use of restraints, interpreter services, hand-off communication, family violence, pain management, EMTALA, Baby Friendly, organ and tissue donation); Infection Control Issues (transmission of infectious control, bloodborne pathogen and healthcare workers, TB); Environment of Care Issues (electrical/utility safety, fire/life safety, emergency preparedness, security, hazardous materials, radiation safety).

Instructions: Circle the **BEST** answer to each question. Submit this completed test to Skills Assessment Workshop or Clinical-Professional Development, Bldg. N-18.

1. Which behavior of the staff indicates a risk factor that may lead to injury:
 - a. Using good body mechanics
 - b. Overreaching for documents
 - c. Limiting repetitive motions
 - d. Sitting in a natural resting position
2. Which of the following guidelines should be followed when carrying heavy objects?
 - a. Always lean backward
 - b. Always hold the object at arm's length
 - c. Use whatever method is comfortable
 - d. Hold the object as close to the body as possible
3. Implementation of HIPAA regulations include:
 - a. Maintaining the same password for security reasons
 - b. Logging off the computer before leaving the workstation
 - c. Sharing password for computer access with only one other co-worker
 - d. Keeping laboratory reports, correspondence, and report sheets in publicly accessible places
4. Confidentiality is most often violated when staff:
 - a. Closes patient exam room doors or draws curtains
 - b. Transports medical records so that patients names are not visible
 - c. Discusses patient information in a public place or social network website
 - d. Immediately removes protected health information (PHI) from printers, fax machines, and photocopiers

5. The statement that best reflects Harbor-UCLA Medical Center's philosophy regarding the use of restraints is:
 - a. Patients may only be restrained if they are on an involuntary psychiatric hold
 - b. Restraints may be utilized only in emergency situations with the patient's consent
 - c. Alternative measures may be tried prior to the initiation of restraints in order to effectively maximize restraint use.
 - d. Restriction of a patient's mobility and movement by the application of restraints will be carried out only in those situations where alternative methods have been considered, attempted, and deemed ineffective.

6. A patient and his 15 year old son show up for a clinic appointment. The patient speaks only Vietnamese. The patient's son speaks both Vietnamese and English. Clinic staff should:
 - a. Speak to the patient in English
 - b. Escort the patient to the Language Center
 - c. Ask the child to interpret to provide care without delay
 - d. Identify the language and utilize bilingual staff in the area

7. Which of the following statements reflects a good understanding of pain management?
 - a. "I believe that patients should not be given pain medications unless their pain is severe."
 - b. "I never believe the patient's statement of pain if the patient has a history of drug abuse."
 - c. "I teach my patients to wait until their pain becomes moderate before taking their pain medication."
 - d. "Following an intervention to relieve pain, I will reassess pain within a time frame that is appropriate to the intervention."

8. The purpose of EMTALA is to:
 - a. Transfer patients with qualified personnel
 - b. Transfer patients to other hospitals with the same level of care
 - c. Provide emergency services regardless of financial or insurance status
 - d. Medically screen patients presenting only to the Emergency Department

9. Which of the following statements demonstrates a thorough understanding of suspected case of child abuse or neglect:
 - a. "It is mandatory to report the case only if there is a current injury."
 - b. "With or without the presence of current injury, it is mandatory to report the case."
 - c. "We healthcare providers are not required to report suspected child abuse case."
 - d. "We healthcare providers are not required to have any involvement in a child abuse case."

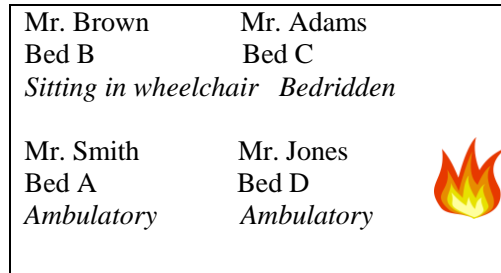

10. Mandated reporters must report child abuse/neglect, elder abuse/neglect, and intimate partner violence to the appropriate agency:
 - a. Within 30 days
 - b. Within 24 hours
 - c. Within one business day
 - d. Immediately or as soon as possible

11. Alcohol-based hand rub may be used in which of the following situations?
 - a. Contact with blood has occurred
 - b. When hands are visibly soiled
 - c. Contact with bodily fluids has occurred
 - d. After touching equipment near the patient's bed

12. The most effective method for preventing healthcare associated infections is to:
 - a. Follow contact precautions whenever possible
 - b. Wear gloves and gown during patient contact
 - c. Perform proper hand hygiene before and after patient care
 - d. Always use alcohol based hand rub during patient care

13. Negative pressure in an isolation room is verified by observing that:
 - a. The door to the patient's room remains open
 - b. An isolation sign is posted outside of the room
 - c. The pink ball above the door is on the inside of the room when the door is closed
 - d. The pink ball above the door is on the outside of the room when the door is closed
14. The three *bloodborne* pathogens of primary concern to healthcare workers are:
 - a. Hepatitis B, hepatitis C, tuberculosis
 - b. Hepatitis B, tuberculosis, clostridium difficile
 - c. Hepatitis B, hepatitis C, human immunodeficiency virus
 - d. Hepatitis B, tuberculosis, human immunodeficiency virus
15. A patient on a cardiac monitor suddenly notifies the nurse of an electrical shock and burning sensation to the chest area. The nurse must immediately:
 - a. Reposition the patient for comfort
 - b. Check the patient and disconnect the cardiac monitor
 - c. Offer pain medication to help reduce the burning sensation
 - d. Educate the patient that the sensation is commonly felt during cardiac monitoring
16. The steps of the PASS method for using the fire extinguisher are:
 - a. Pull the pin, Aim the extinguisher, Squeeze, and Sweep
 - b. Push the lever, Aim the extinguisher, Squeeze, and Sweep
 - c. Pull the pin, Assemble the extinguisher, Squeeze, and Shoot
 - d. Push the lever, Assemble the extinguisher, Squeeze, and Shoot
17. When a fire occurs, the "R" in RACE responds for:
 - a. Report the fire
 - b. Remove people
 - c. Respond quickly
 - d. Retrieve the extinguisher
18. Which is the correct code to call after a one liter bag of chemotherapy is spilled on the floor?
 - a. Red
 - b. Triage
 - c. Gray
 - d. Orange
19. An earthquake has occurred near Harbor-UCLA. The overhead-paging system announces Code Triage. Staff should immediately:
 - a. Evacuate patients from the building
 - b. Report to the nearest emergency management station
 - c. Ensure that the crash cart and emergency box are readily available
 - d. Return to one's normal assigned workstation and check the status of the patients
20. An employee finds a suspicious unopened package and notifies the County Sheriff. The next step would be to:
 - a. Prohibit entry into the area
 - b. Check to see if the package is labeled
 - c. Open the package to determine the contents
 - d. Carefully place the package into a trash can
21. Principles of radiation safety include:
 - a. Keep time exposure, distance, shielding and contamination at a minimum
 - b. Keep time exposure and distance to a minimum, use shields and control contamination
 - c. Keep time exposure and distance to a maximum, use shields and control contamination
 - d. Keep time exposure to a minimum, maintain a safe distance, use shields and control contamination

22. Preventing sharps injuries involves:
- Recapping used needles
 - Using sharps safety needles
 - Overfilling sharps containers
 - Disposing sharps in a trashcan
23. The curtains in a patient room by bed D are on fire and the patients need to be evacuated from the room. Please refer to the diagram below regarding the location of beds and the patients in the room. The description of patients in terms of mobility and activity at the time of fire are as follows:

- Identify the correct order to remove patients from the room during evacuation:
- Mr. Brown, Mr. Smith, Mr. Jones, and Mr. Adams
 - Mr. Jones, Mr. Smith, Mr. Brown, and Mr. Adams
 - Mr. Jones, Mr. Adams, Mr. Smith, and Mr. Brown
 - Mr. Adams, Mr. Smith, Mr. Jones, and Mr. Brown
24. A Code Pink is called. Which of the following actions would be appropriate for the nursing staff to take?
- Isolate the spill and call Radiation Safety
 - Close all doors and locate the nearest fire extinguisher
 - Look for and report suspicious persons or bundles to the County Sheriff
 - Identify the location of the unresponsive child/infant and bring a crash cart
25. Which of the following is a benefit of breastfeeding to infants?
- An increased risk of gas pain
 - An increased risk of diabetes
 - A decrease risk of urinary tract infections
 - A decreased risk of ear and respiratory infections
26. All patient's deaths must be called into One Legacy in what time frame?
- Within one hour
 - Within two hours
 - Within three hours
 - Within four hours
